

GOLF GENIUS OVERVIEW

NIMAGA uses Golf Genius software to do all of our tournament management.

There are two components to Golf Genius.

- The first is the 'online' Member Profile and Tournament portal pages. This is accessed through a browser. You already have used this function to join NIMAGA and enter tournaments.
- The second is the 'mobile app' that is used for tournament day activities.

Prior to the tournament, you all should download the Golf Genius app on to your mobile devices. Just search your app store for 'Golf Genius' and download (it is a free app).

On the day of the tournament, you will be given a White Card prior to your foursome teeing off.

- On one side of the card will be your Division, Tee Time, and a Golf Genius ID (GGID) with places to record scores.
 - You will be keeping score for the player identified on the card, but a good practice is to keep score for the entire foursome.
 - This will be used to validate everyone's scores at the end of the round.
- On the other side of the card will be Scorecard Scoring Procedures that you will need to follow through the course of your round.

When you open the Golf Genius app, log in with your email address and password or the GGID from the top of the scorecard. Access the tournament that you are participating in.

- From there you can see tournament information (scorecards, leaderboards, etc.)
- But communicate with the other members of the foursome as to who will do the realtime scoring. It should be just one person entering scores.

We have been using Golf Genius since 2021, so our members are familiar with the use of the mobile app.

When in doubt, just ask a member of your foursome for Golf Genius help.

Remember, the Golf Genius mobile app is only used for tournament day activities.

- Real time scoring
- Live leaderboards
- It cannot be used to enter a future tournament.
